NOTICE.

Sealed bids for the refreshment and score card privileges at Intervale Park for the season of 1906 will be received up to and including June 11th, 1906. Address all communications to D. W. Smith, City.

NOTICE!

Montpelier, Vt., June 1, 1906.
This circular is to give notice that, notwithstanding the circular of May 15, 1906, signed by Harry W. Whitcomb, and notwithstanding the patent right suit instituted by him against our firm, we are still supplying our customers with polishing wheels and parts of the same, and taking care of all patent rights suits that any person may see fit to bring against us.

No person need have any fear of any patent right polishing wheel suits, as this is not the first one that has been brought. Said Whitcomb brought one in April, 1897, and the same has been pending in court ever since, as the instigator of it has never seen fit to do anything with it, and customers are in no more danger now than they have been in the past nine years. Moreover we will defend and take the consequences of any patent right suit resulting from the use of our polishing wheel or scrolls.

Our newly patented machine for turning the scrolls of our polishing wheel (the only one of its kind ever made) enables us to put on the market a polishing wheel far superior to anything else of its kind, and to sell them at the same price as those of inferior grade. We expect to retain exclusive control of this machine and to continue to produce the best polishing wheel ever made, with no advance in price.

Thanking our customers for past orders, we solicit your patronage for the future.

ARMY AND NAVY NOTES.

The latest French cruiser has been named the Ernest Renan, a fact that would amuse the famous man if he were alive to know it.

Gymnast's army on a peace footing has 63,000 horses with the cavalry and 36,000 with the artillery. Every horse in the German empire is registered and available for service.

The Japanese army is recruited by conscription, but only twenty-five of the strongest and healthiest are picked out of every hundred men called up for service. The remainder are sent into the reserve.

The question is being discussed in London whether the war department or the navy department has the legal right to buy and operate airships for fighting purposes. Some suggest a new department of national defense—the "aerality."

SHOT FOR SPITE.

New York Man Tried Suicide After Shooting Wife.

New York, June 9.—Mrs. Margaret Eshbach, sixty-eight years old and well-to-do, who lived quietly with her daughter on a farm in Ferris lane, just off Fort Schuyler road, was shot yesterday and probably fatally injured by her husband, Edward, with whom she has not lived for a year.

The aged man, who is said to have tried to kill his wife before, left his home about a year ago because of a quarrel following the woman's refusal to give him money and transfer to his name property left by her first husband. He went to work on the farm of Charles Klot, close to his home.

Eshbach was captured only after a fight, and held by Magistrate Walsh in the Westchester police court in \$1,000 bail on a charge of felonious assault.

When the police battered down the door of the barn in which he had hidden, he tried to cut his throat with a razor.

At the Fordham hospital, where Mrs. Eshbach was taken, it was said that she might die at any moment, as there was internal bleeding from a wound just below the heart.

Mrs. Kern, the dying woman's step-daughter, had a narrow escape from death. Eshbach fired five shots at her as she fled from the garden to the house, but all went wild. Attracted to the door by the noise, Mrs. Eshbach at once became the target for her enraged husband, who had reloaded his weapon. He fired one shot, then dashed away.

SIRENS AND SONS.

Mayer McClellan of New York has taken to old fashioned gull pens in signing public documents.

Secretary Shaw has a number of push buttons on his desk, including one which rings when he finds his visitor to be a "crank."

Dillon Wallace, the explorer of the Labrador wild, has arrived in New York from Quebec. He is the first man that ever carried the mail from Fort Chimo to the steamer at Eskimo point.

Representative Brownlow, who introduced the bill to provide for federal care of Andrew Johnson's grave, is a nephew of "Parson" Brownlow, who described Johnson as "the dead dog in the White House."

Professor Milne, the famous seismologist, was the first man to drive a golf ball across the Victoria falls, on the Zambezi river, this being done during the recent visit of the British association to South Africa.

Higher Walton of the Darwin division of Lancashire, England, can boast of a unique record. Out of a possible 425 votes 420 were recorded for him, and of the five missing voters one was in America, one in Canada, one on the sea and two sick in bed.

Joseph Chamberlain, the English statesman, will have two notable celebrations during the coming summer. On June 17 he will have completed thirty years of continuous representation of Birmingham in the house of commons, and on July 8 he will reach his seventieth birthday.

James H. Vassar, who has been connected with the United States treasury at Boston more than forty years and nearly that length of time in the important position of special clerk, is the most remarkable and accomplished coin expert in America and has few if any equals in the world.

Accurate tab has been kept on Baron Rosen, the Russian ambassador, since he arrived in Washington, and nobody ever saw him without a cigar in his mouth or in his hand just ready to be put into his mouth except when he was at a state function or dining, and then he always smokes between courses.

They Eat Alone.

The Maldivian Islanders eat alone. Before a meal they retire to the most secluded spot they can find and eat with drawn blinds or surrounded by a screen. The explanation of this precaution is more likely to be fear than modesty. In days gone by the savage no doubt concealed himself lest some man stronger than he should snatch his hard earned food away.
